“60% of APAC Organizations will experience digital skills shortages that cause project delays by 2027, slowing AI technology implementations into the following year.”

16 months

average delay to digital initiatives due to lack of IT skills

Weakened Competitiveness

Reduced Business Performance

Delayed Digital Transformation

Lessons from Digital-First CEO Leaders

1. Use Tech-To-Compete

2. Incentivizing a customer-centric culture

3. Data-driven decision making

4. Reskilling the labour force

AI Has Huge Business Impacts, and will Create More Jobs

“There may be disagreements about how much to invest in AI, but not doing AI would be risky.”

Kim Jun-hwan,
Head of Digital Part (Group CDO & CIO),
Shinhan Financial Group

Source: Yonhap News

BUSINESS IMPACT

Agree that AI will have significant impact to their business model or competitive positioning

AI AUGMENTED WORK

Agree that AI will create more jobs than it eliminates over the next 5 years

State of AI Adoption

“AI spending will grow at **1.6x** the rate of overall digital technology spending in the next three years, generating an APAC economic impact of over **\$1.2 trillion** by the end of 2027.”

- IDC
